SUMMARY

Full Stack Software Engineer with 5 years of experience developing scalable SaaS platforms and web applications, along with 8 years of expertise in web design, branding, and digital content development. Experienced in full product lifecycle management, from architecture and development to deployment and optimization. Skilled in Java, JavaScript, TypeScript, Spring Boot, React.js, Node.js, AWS, and secure system design. Proven ability to deliver enterprise-grade software solutions while collaborating directly with clients and cross-functional teams.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Ruby

Frameworks/Libraries: Spring Boot, React.js, Node.js, Ruby on Rails, Thymeleaf, Tailwind CSS, Bootstrap

Cloud/DevOps: AWS, GitHub, GitHub Actions

Databases: PostgreSQL, MySQL

Testing: JUnit, Jest, React Testing Library

Security: Spring Security, JWT, OAuth

Web & Design: Canva, Figma, Squarespace, WordPress, Adobe Creative Suite

PROJECTS

Shelved — Visual Media Collection Platform

[Demo Application](#) | [Application Code](#)

- Built a full-stack social platform for organizing, curating, and sharing personal collections of movies, music, books, and games.
- Architected the backend with **Java, Spring Boot, and PostgreSQL** to support scalable data relationships across multiple media types.
- Integrated **AWS S3** for secure cloud storage of user media, artwork, and cover images with dynamic retrieval.
- Implemented **Spring Security with JWT** for secure user authentication and session management.
- Delivered a fully responsive front-end experience with **Thymeleaf, Tailwind CSS, and JavaScript** for modern mobile-first design principles.

Lockbox — SaaS Master Key System Management

[Demo Video](#) | [Frontend Code](#) | [Backend Code](#)

- Built a full-stack SaaS platform for locksmiths and institutions to generate, manage, and maintain Master Key Systems across large-scale campuses.
- Engineered a high-performance client-side application in **React.js and JavaScript**, processing 5,000+ real-time data points while maintaining responsive and reliable UI performance.
- Designed and implemented a scalable backend with **Ruby on Rails** and relational data models in **PostgreSQL**, reducing backend load by 30% through optimized queries and data structures.
- Developed secure **RESTful APIs** with integrated **OAuth authentication**, enabling real-time synchronization and dynamic key generation logic.
- Delivered a fully responsive, mobile-first interface with **Bootstrap** for seamless accessibility across devices and platforms.

PROFESSIONAL EXPERIENCE

W3B//D3V — San Diego, CA | January 2021 – Present

Full Stack Developer

- Designed and delivered customized full-stack software solutions for 5–10 clients across multiple industries, increasing client satisfaction and retention by 40%.
- Engineered highly scalable, end-to-end applications utilizing **Java, Spring Boot, React.js, Ruby on Rails, PostgreSQL, MySQL, AWS, and secure RESTful APIs.**
- Enhanced system reliability and scalability through Test-Driven Development (TDD) practices using **Jest, React Testing Library, and JUnit.**
- Improved client acquisition by 50% through detailed solution proposals, technical documentation, wireframes, and mockups.
- Developed and deployed robust SaaS platforms using Agile workflows, collaborating directly with clients and cross-functional teams.

Brighten Creative — San Luis Obispo, CA | September 2017 – January 2021

Web Designer & Developer

- Designed and developed custom websites, branding, and digital content for 10–20 clients simultaneously, enhancing brand visibility and user engagement.
- Managed domain registrations, hosting, web servers, and CMS platforms (WordPress, Squarespace) with front-end customization using **HTML, CSS, JavaScript, and responsive design.**
- Created consistent branding collateral, logos, and digital assets using **Adobe Creative Suite, Canva, and Figma** to maintain cross-platform consistency.
- Consulted with clients to deliver fully customized web solutions aligned with business objectives and user experience goals.

ADDITIONAL EXPERIENCE

Roll Digital — Sacramento, CA | June 2015 – September 2017

Communications Manager

- Developed and executed automated drip campaigns and optimized sales funnels to increase lead conversion and client retention.
- Analyzed marketing performance data and presented actionable analytics in monthly client strategy meetings, contributing to a 2–3x increase in long-term client retention.

Family Care Network Inc — San Luis Obispo, CA | December 2012 – June 2015

Multimedia Coordinator

- Produced 10–20 digital video projects annually for online and television marketing, using Canon camera systems and Adobe Creative Suite.
- Presented media projects to board members and senior leadership for review, feedback, and final approval at monthly strategy meetings.

EDUCATION

Flatiron School — Certificate in Full-Stack Software Engineering

- Certificate in Software Engineering (525 Clock Hours)
- JavaScript, React.js, Ruby on Rails, PostgreSQL

Palomar College — Graphic Arts & Marketing

- Adobe Creative Suite, Digital Marketing, and Web Strategy
